May 23, 2021 Mona Shuaib / Mother Jones Hillary Clinton has expressed a willingness to back a government crackdown on the leaks of classified information to the press. At least, she said she had back in March, while the diplomatic cables were still under wraps. But when her former right-hand woman at State, Ann Marie Slaughter, published a op-ed on Sunday for The Washington Post's "On Faith" section, soliciting the president to order his "chief legal officer and top national security adviser to establish an independent commission to investigate whether classified information was illegally released to The Post

by members of the intelligence community,” Clinton’s staff declined to comment, according to Mother Jones reporter Kevin Gosztola. Gosztola wrote Monday that Clinton’s staff told him that “there was no change on the record from her remarks three months ago.” Gosztola adds that, “Clinton aides would not deny she had said these words, or that they were now considered actionable.” He says aides have asked him not to publish such accounts in the future, “even if they were true.” The Post’s editorial board first reported the story, even though Slaughter’s op-ed did not specifically call out the paper by name, and even though the story didn’t go into great detail about the precise circumstances of the Obama administration’s demand for an independent investigation into the leaks. Gosztola’s story was the first

that did—and more than a year after the fact, at that. The flurry of news stories that has followed the leaks—both from the Post and elsewhere—has raised questions about the effectiveness of current leak investigations. The Associated Press found that while the administration had pursued investigations of some of the leaks, those investigations had in many cases ended in no charges and with the Justice Department indicating that it didn't think it had jurisdiction. (Last week, a secret-service agent who works in the West Wing was arrested for allegedly leaking classified material to the Post.) Leak investigations have also stoked controversy and sparked protests.
