I need to make a one to many relationship between products and the configurations in which they can be used. My initial approach is to have a "Configurations" table which has a configuration ID as a primary key. A "Products" table, which has a "Configuration" field with a foreign key of ID. When a new configuration is created it will automatically have a default value for the "Products" field of NULL, allowing to set the value later. I'm not sure if this is the correct way to do it. Is there a way to store IDs from one table in another table without using a 'junction' table? Is it considered normal to have "0" for the value when creating a new record? Many thanks! A: I would just normalize that down. If you have the following tables: CREATE TABLE Product (ID int primary key, Name varchar(100)); CREATE TABLE Configuration (ID int primary key, Name varchar(100)); CREATE TABLE ProductConfiguration (ProductID int, ConfigurationID int, foreign key constraint fk_productconfiguration_product references Product (ID), foreign key constraint fk_productconfiguration_configuration references Configuration

Mainly based on ADLIB, the powerful macro language, the KeyMacro app includes over 40 unique macros, as well as the ability to create your own macros. Work on text, lists and text-nodes, image manipulation and commands. Create advanced macro actions from groups of basic commands. Create macros that open a file or run a command. Copy and paste data from one document to another. The user interface is very intuitive, with commands being presented one by one. Also, you can watch a little tutorial of macros you can create and run. KeyMacro is very powerful, easy-to-use and, above all, the overall experience was pleasant. Of course, some basic controls need to be learned and understood, but this is a common problem among macro-based tools. KeyMacro has a basic set of icons, so you know how to start and stop macros. Plus, it has an undo and redo option. AVS Express Editions App Description: AVS Express Editions is a suite of applications for managing your audio and video collections. AVS Cover Editor is a software application designed to help you create, edit and print covers for your CDs and DVDs. It can be handled by all types of users, regardless of their skill level. The app is wrapped in a user-friendly interface where you can design the disc, front and back cover in a few simple steps. Importing images into the working environment is done by using either the file browser or "drag and drop" method, as long as they have the PNG, JPG, JPEG, BMP, ICO, EMF or WMF format. So, you can bring objects to the front or send them to the back, add regular or rounded text, as well as select one of the 22 preset covers provided by the app, if you don't want to personalize the disc. Furthermore, you can select the mode and inner radius of the layout. Simple graphic editing tools revolve around lines, polylines, rectangles, polygons, circles, ellipses, pies and sectors. Plus, you can zoom in and out, pick the grid size and measurement unit for rulers, as well as undo or redo your actions. The project can be saved to file for further modifications or exported to the BMP, JPG, TGA or PNG format. AVS Cover Editor requires a pretty high amount of CPU and system memory, is very responsive to key strokes and mouse events, and includes a help file. No error dialogs have been shown throughout our evaluation and the tool did not hang or crash; we haven't come across any issues during our tests. Thanks to its intuitive layout, AVS Cover Editor can be handled by all types of users, even novices. by Media Mogul This software product is so good that it runs on its own and does not need anything else. This is a freeware utility that works very well. by Ulf Holz I use this program from time to time. Its very good. But I have the problem that it is not possible to rotate it on the X-Axis for a desired amount of degrees, and also the redo of cropping or resizing of the image will not work. by Skoda Esse I have used the software for some years now, and have always found it to be very good, simple, no difficulty, and intuitive. When I had to use a better program, it was very difficult to find a simpler program that
